Daniil Leshakov | Middle UX\UI Designer

t.me/kotolaser | daemory@yandex.ru | kotolaser.ru/en | Saint Petersburg, Russia

Profile

Over 5 years in design. Specialization: design systems, high-load B2B SaaS interfaces, mobile applications. Strong knowledge of design system architectures and their maintenance/development. On the UX side, I can conduct interviews and usability testing, design flows, create mockups and prototypes. Strong analytical skills. Have freelance experience with websites for B2C companies.

Work Experience

NDA

December 2021 – Present

Created a token-based design system with full customization to meet all client requirements and project team needs. It helps designers assemble mockups faster and developers implement them more efficiently. I manage token storage, assemble and test components, and write documentation. Built a clear process from icon export to front-end and status tracking. Led a redesign and migrated the design system from MDC to Tailwind. Work on the design system is carried out together with two developers: a lead developer and a senior front-end developer.

Inspector Application: Created an application for construction inspectors on-site. Designed a solution that makes it easy to handle key scenarios: tracking priorities, documenting construction progress.

Mobile Filter Constructor: Built the first fully functional condition constructor in a mobile interface.

Calendar Network Planning Project: Conducted user interviews on competing CSP systems, ran usability tests, and optimized flows for more effective task completion by product users. Collaborated with a design lead.

Tables: Implemented a more convenient table management experience compared to the previous version. Reduced unnecessary clicks during table editing and built additional functionality: filter constructor, batch actions setup, etc. Collaborated with a design lead.

Messenger: Developed the messenger flow and mockups for an internal client.

Freelance Projects

December 2021 – Present

Inderoom.ru: Interior design agency website. Developed the visual style, landing page, logo, and agency portfolio catalog.
Starshine-drive: Motor reducer sales website. Redesigned the homepage.
Donly.ru: Created a 3D animation for the homepage.

Devexperts

July 2021 – December 2021

Completed an internship at fintech product Devexperts on a project adapting charting from desktop to mobile. Worked in a team of 6. Conducted user interviews on competing products, worked with hypotheses, built flows, mockups, and a UI kit. The project passed a successful review.

Education

"UX/UI Designer" — GeekBrains

December 2020 – December 2021

Studied research methods: interviews, CJM, usability tests, data analysis. Worked with hypotheses: how to formulate and verify them. Design tools: Figma, Illustrator. Worked with metrics. Artifacts: user flows, wireframes, prototypes.

Languages

Russian — native
English — intermediate. Not formally tested.

Skills

UI — Strong
UX — Strong
Research — Good
Design Systems — Strong
Graphic Design — Strong
HIG/Material — Strong
HTML/CSS — Advanced
Marketing — Good
AI — Strong

Tools

Figma — Professional
Photoshop — Advanced
